One brand universe

This document defines **SIRAJ Brand Identity v1.0**: the official visual identity, design system and motion system (all three closed at v1.0, production ready) of SIRAJ Real Estate Development. It is written for designers, developers, marketing teams, video teams and external agencies.

Everything shown here exists as a production file in the brand repository. Where this document shows an example, the repository contains the editable source and the exports.

How to use it. Read the foundations first: idea, logo, colour, typography and silk. Then use the application chapters as references. When in doubt, choose restraint.

Source of truth. github.com/Mr-Ghassan/SIRAJ. Tokens, fonts, logos and templates are versioned there.

SILK & LIGHT: THE PROJECT, MUSCAT. REAL SILK, REAL ARCHITECTURE.

The project in Muscat · residential apartments and retail shops

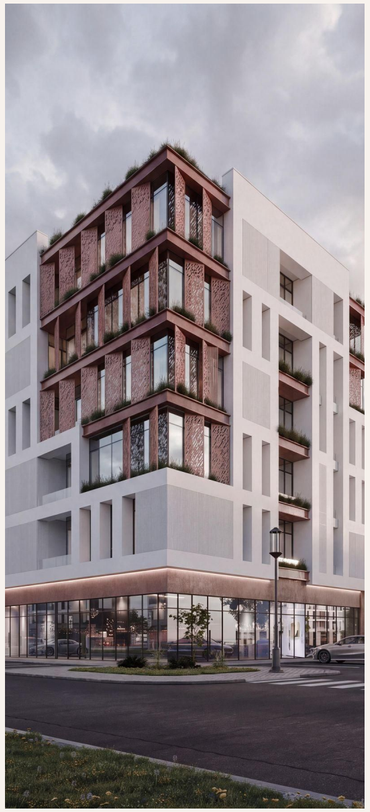

مسقط · شقق سكنية ومحلات تجارية

The first SIRAJ project. The SIRAJ brand mark is the English wordmark; «سراج» is never typeset as a name. A project-name treatment is **postponed** (client decision, 13 October 2026); until one is approved the project is identified by the logo, «مسقط» and the exact description «شقق سكنية ومحلات تجارية». Copy speaks about place, light, architecture, material, life and detail.

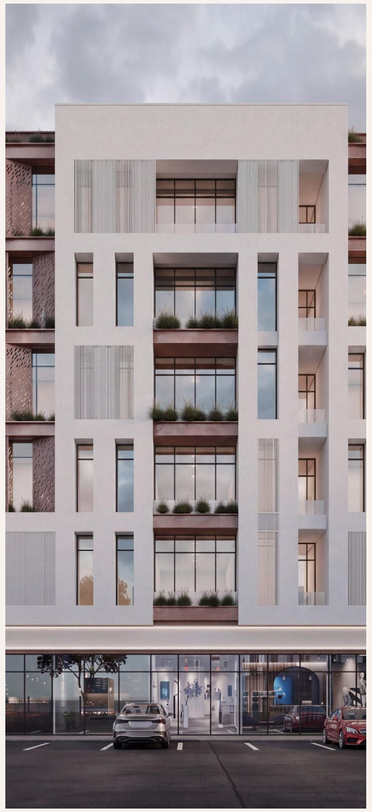

- Name: no typeset project name (treatment postponed); logo + مسقط
- Description: «شقق سكنية ومحلات تجارية», word for word
- No floor-by-floor wording in public copy
- Prices, areas, unit counts and dates appear only once confirmed
- Approved lines: «أوّلُ · «في قلب المدينة، بيتٌ من ضوء.» · «حين يحلّ المساء، يُضيء سراج.» الضوء.»

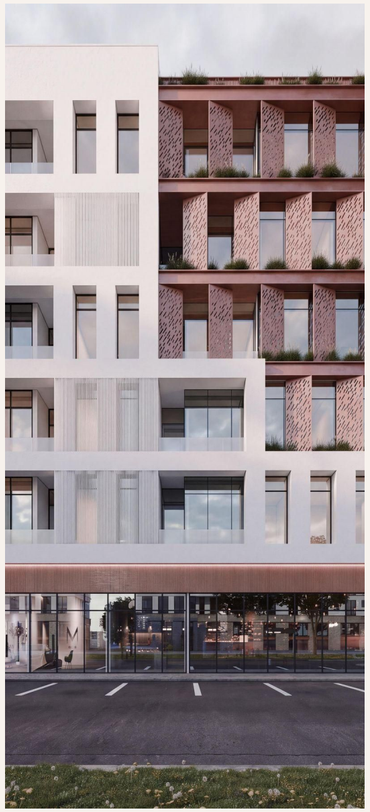

The project · official imagery

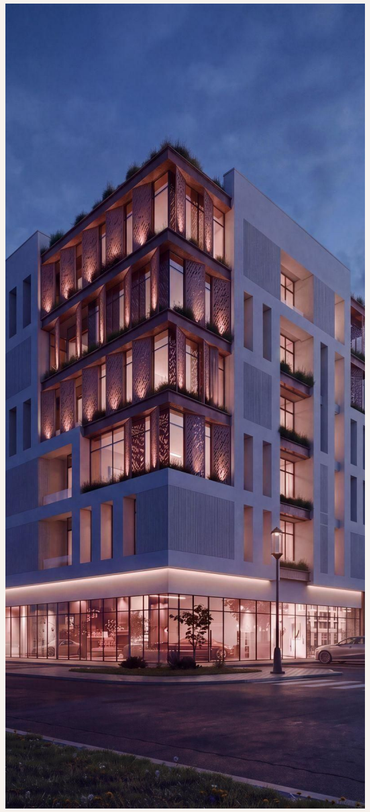

CORNER · CLOUDY DAY

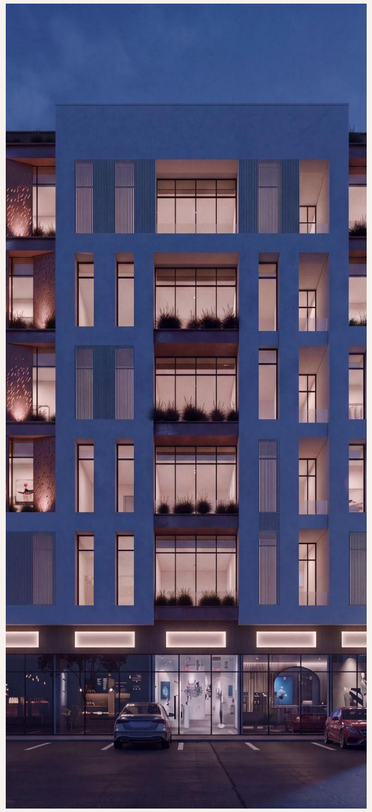

FRONT · CLOUDY DAY

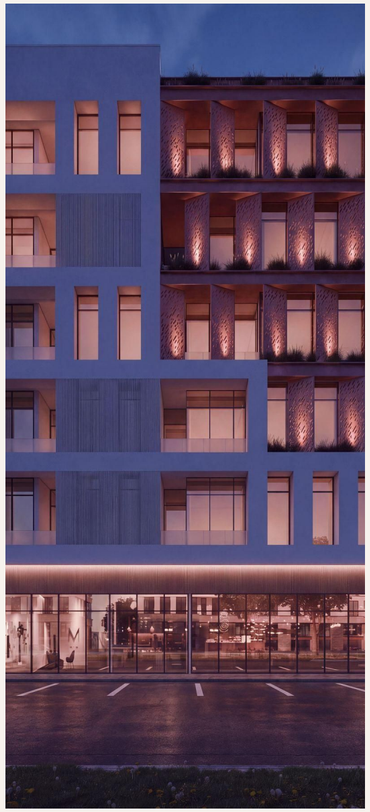

SIDE · CLOUDY DAY

CORNER · BLUE HOUR

FRONT · BLUE HOUR

SIDE · BLUE HOUR

Design by ORIX × Waleed Eid Group. These six publish-ready 4K renders are the official images of the project. People and placeholder signage were removed, and the light was refined to a cinematic cloudy day and blue hour, then finished with the SIRAJ Luxe Grade (no yellow cast). The architecture is unchanged. The architect's originals are kept as source only (14-Property-Marketing/12-Project-Siraj/Source/Architect).

The lamp gives light. Silk carries it. Architecture makes it last.

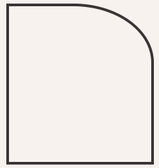

Light · the Lumen ◆

Siraj (سِراج) means *the lamp*: one steady light against which everything is seen. The two stone diamonds above the I and the J are its flames.

Silk · the philosophy

Soft yet strong, flexible yet cohesive, simple in material and rich in presence, changing with light. Flexibility in thinking, precision in execution, fluidity in experience.

Architecture · lasting value

The grid, square corners, real buildings and generous space express permanence and value. Architecture always comes first.

SIRAJ — Architecture shaped with the elegance, continuity and controlled movement of silk.

Confident without noise, luxurious without exaggeration

Confident
without noise

Luxurious
without exaggeration

Modern
without losing dignity

Investment-minded
without being dry

Creative
without becoming experimental

Ambitious
without pretension

The language is **clear, calm, intelligent, confident and persuasive.**

WE RELY ON	WE NEVER USE
Facts and numbers	Exaggeration
Design and product quality	“The most luxurious ever” · «الأفخم على الإطلاق»
Location	“Once-in-a-lifetime opportunity” · «الفرصة التي لن تتكرر»
Vision and value	Excessive sales language
Labelled, verifiable figures	Unsupported investment promises

A residence shaped by light and silence.

مساكن تتشكّل بالضوء والسكينة.

Considered in every detail. Built to last.

مدروسة في كل تفاصيلها. مبنية لتدوم.

Value that lasts.

قيمة تستمر.

SIRAJ speaks Arabic

كل منشوراتنا وتسويقنا، للشركة والمشروع الأول، باللغة العربية فقط.

All communications for SIRAJ and its first project in Muscat are in **Arabic only**: social, advertising, print, presentations, property marketing, video, signage, events and web.

- ◆ Arabic copy, Tajawal type, right-to-left layouts.
- ◆ Latin is allowed only for the SIRAJ wordmark, WWW.SIRAJPROPERTIES.NET, SIRAJPROPERTIES and the phone. Digits are always Western (0–9).
- ◆ Business card, quotation, tax invoice, receipt and contract cover may stay bilingual, with Arabic primary.

- × No English posts, captions, videos or brochures.
- × English is dormant. It is activated only for a freehold project open to foreign ownership, and only for that project. Archive: 99-Archive/English-Dormant.

INTERNAL · NOT FOR PUBLIC COMMUNICATION

From selling the unit to selling the value

Every project has a story, an idea, a personality, a clear value, and a convincing reason to buy and to invest. A client must understand within seconds **why this project is different.**

01

Location

الموقع

Why here, and why will its value grow?

02

Product

المنتج

How is it designed for the client and the market?

03

Experience

التجربة

How will it feel to live or invest here?

04

Investment value

القيمة الاستثمارية

Why is it an asset, not just a unit?

05

Trust

الثقة

Who develops it, and how will it be delivered and managed?

Marketing is part of development, not a department that comes after it. It begins with land selection, market study, the client, unit mix, pricing, amenities, name, identity and the customer journey. **We build what the market needs and can absorb.**

INTERNAL · NOT FOR PUBLIC COMMUNICATION

PRE-LAUNCH · LAUNCH · SUSTAIN

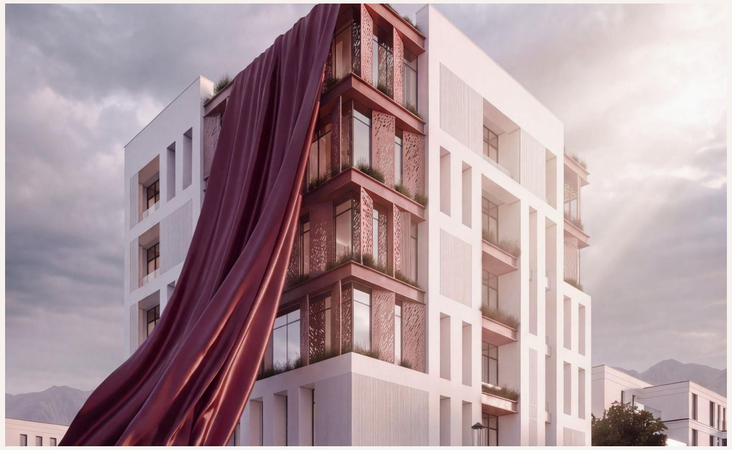

PRE-LAUNCH

Build interest without revealing everything

- Veil: silk partially conceals the building

Teasers, register-interest page, broker kit, PR, project-story film

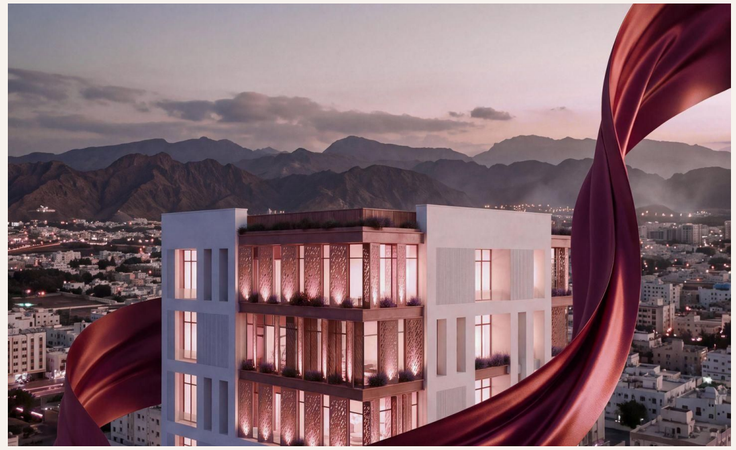

LAUNCH

Maximum market focus in a short time

- Reveal: silk sweeps away (Silk Reveal, Silk Sweep)

Launch film, event, outdoor, digital, brochure, price list

SUSTAIN

Momentum until sell-out and handover

- Connect: one ribbon links the progress stories

Construction updates, testimonials, investment content, remaining units, handover

One master brand, one real project

SIRAJ is the master brand. Its first project is in Muscat. Future projects will each have their own name, story and imagery, and always carry the SIRAJ endorsement; they are introduced only when they are real.

SHARED BY EVERY PROJECT	OWNED BY EACH PROJECT
Typography, grid, Lumen, real silk, the Luxe Grade, voice, endorsement	Name, story, photography, architecture

No fictional projects appear in any material. Demonstration content is isolated in 99-Archive/Demo-Isolated.

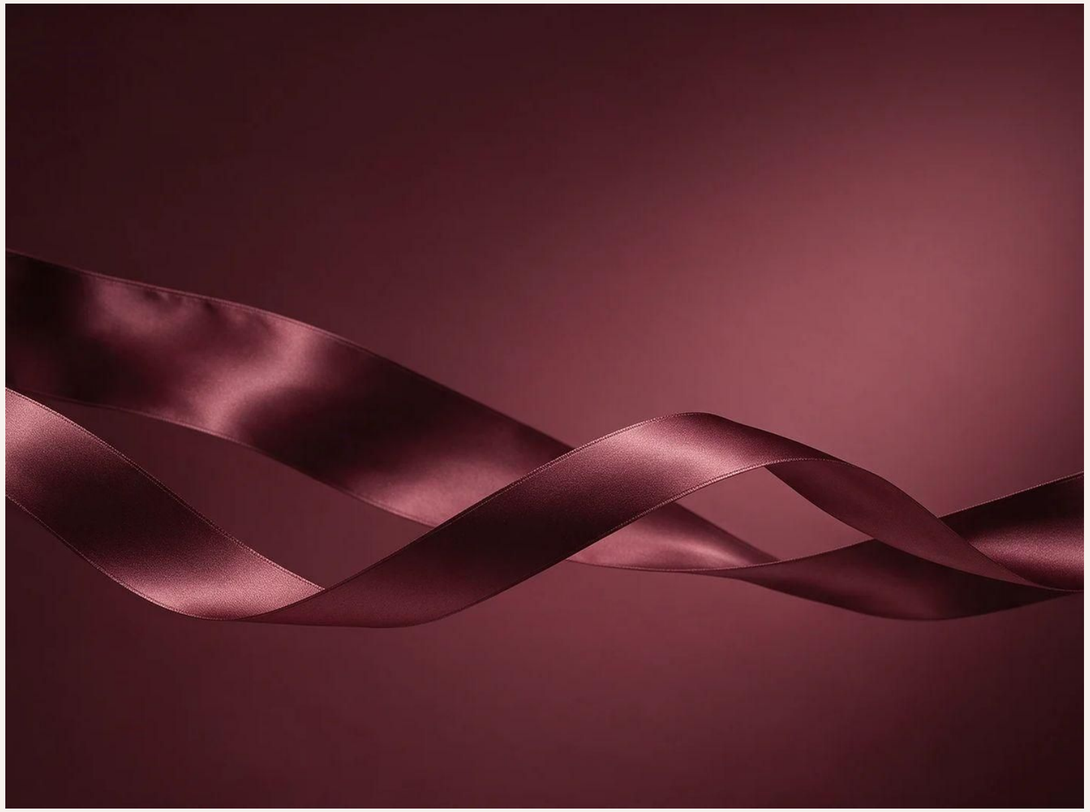

Silk is a philosophy and a behaviour

Soft yet strong. Flexible yet cohesive. Simple in material, rich in presence, changing with light and movement. Silk is SIRAJ's character: **flexibility in thinking, precision in execution, fluidity in experience.**

REVEAL	Silk moves away to uncover architecture or content.
FRAME	Two silk forms or a Silk Corner frame the subject.
CONNECT	A single ribbon or line links pages, scenes and campaigns.
GUIDE	Silk travels along the 51° axis and leads the eye.
TRANSITION	Silk carries one scene into the next.

Hierarchy on every layout: architecture first, information second, silk as the signature gesture, logo as the final identifier.

10

Logo

الشعار

The official wordmark

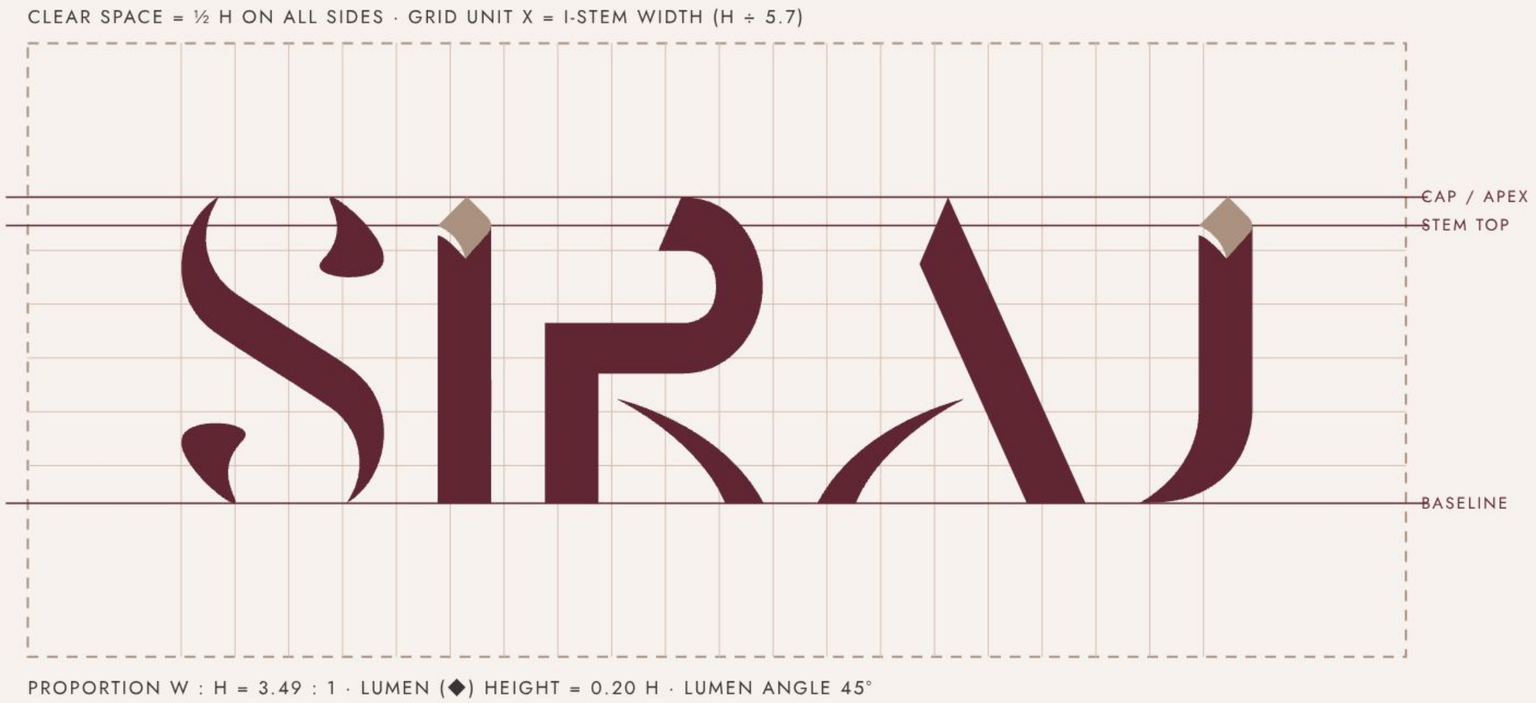

Fixed geometry. The wordmark is reproduced exactly from the supplied Illustrator master. It is never redrawn.

Stencil capitals. The calligraphic S and the tapering blades of R and A are the origin of the Silk Blade.

Lumen ◆. The stone diamonds on the I and J are the light of the lamp, and they are part of the logo.

Construction and proportion

W : H = 3.49 : 1. Grid unit X is the I-stem width (H ÷ 5.7).

Lumen is 0.20 H high, set at 45° and centred on the stem.

Baseline is shared by all letters; the A apex sets the cap line.

Clear space and minimum size

Keep a clear space of ½ **H** on every side, where H is the height of the wordmark.

MEDIUM	MINIMUM WIDTH
Screen	96 px
Print	25 mm
Embroidery / emboss	40 mm
Signage (viewing ≤ 10 m)	600 mm

Below the minimum size, use the S monogram (avatars and favicons only).

One mark · the corporate name is text

The official SIRAJ English artwork is the brand mark. The only approved lockup is the **Descriptor**: the wordmark over «REAL ESTATE DEVELOPMENT» in Jost, outlined, for English-only contexts.

The Arabic-name lockups (horizontal, stacked and Arabic-led) were withdrawn on 2026-10-15 and archived. The registered Arabic corporate name «سراج للتطوير العقاري» appears only as normal legal or administrative text where it is required: a letterhead footer, a contract, the return address on an ID card. It is never a logo, never set beside the wordmark as one unit, and never a substitute lockup.

Monogram, favicon and avatars

The S is lifted unchanged from the wordmark. It is for app icons, favicons and avatars only; it never replaces the wordmark in communication.

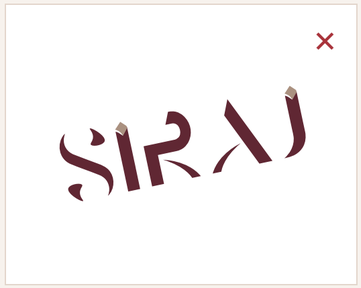

Incorrect usage

DO NOT STRETCH OR CONDENSE

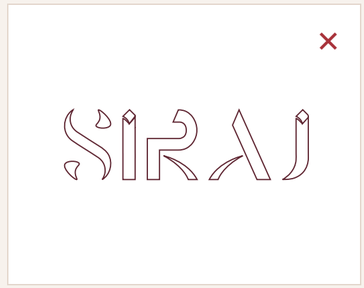

DO NOT RECOLOUR

DO NOT ROTATE

NO EFFECTS OR SHADOWS

NO OUTLINES

NO GRADIENTS IN THE LETTERS

DO NOT LET SILK CROSS THE LOGO

DO NOT PLACE IT IN A CONTAINER

DO NOT REMOVE OR RECOLOUR THE LUMEN

NO LOW CONTRAST

DO NOT ADD WORDS TO THE WORDMARK

DO NOT SET "SIRAJ" IN A FONT

168 residences in Al Khuwair, Muscat. From OMR 145,000. Handover Q4 2027.

متاح للبيع الآن

بيت من ضوء

168 وحدة سكنية في الخوير، مسقط. تبدأ من 145,000 ر.ع. التسليم الربع الرابع 2027.

Optical alignment. Align the Latin cap height with the top of the Arabic letter bodies, and share baselines across columns. Arabic sits about 8% larger.

Reading order. In side-by-side layouts, Latin runs on the left and Arabic on the right. Each column aligns to its own start edge, and both mirror the same grid.

Mixed runs. Wrap Latin words, numbers, phone numbers and URLs inside Arabic text in `<bdi>` or a `dir="ltr"` span so that bidi never reorders them.

Western digits are used **everywhere**, including Arabic text, so that prices, areas and dates read identically in both languages. The **SIRAJ Digits** face maps Jost figures onto the digit code points and is loaded ahead of Tajawal. Use tabular lining figures in tables, and never use Arabic-Indic digits (٠١٢٣).

The thousands separator is a comma and the decimal mark is a point. Currency is written **OMR** before the amount in English and **ر.ع.** after it in Arabic.

Silk travels along the 51° Silk Axis and lives in the lower-end third, the Silk Field. Type always sits on columns and baseline. RTL mirrors the grid, but never the logo.

Signature elements

05 · GRAPHIC SYSTEM

Signature elements

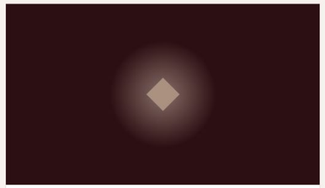

Every element comes from the wordmark or from the behaviour of silk. Architecture sets the order and silk supplies the gesture. Use one signature element per layout.

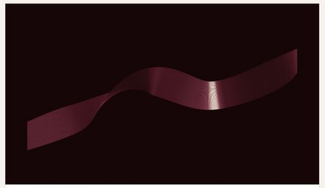

SILK BLADE
The crescent of the R leg in the official wordmark. It is the brand's signature curve, used for dividers, accents and section openers.

SILK LINE
A single tapered thread that crosses a layout to connect content. It is never a decorative squiggle.

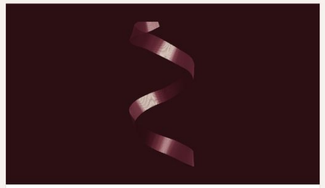

LUMEN ◆
The light from the I and J of the wordmark: a marker, bullet, pin head and active state.

SILK RIBBON · VECTOR
Special production only: vinyl cutting, embroidery, special print, fabrication. Never in place of real silk.

SILK RIBBON · TONAL
Special production only: a five-tone ribbon for screen print, cut vinyl and embroidery.

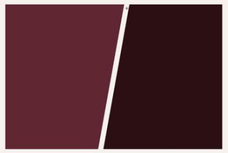

SILK WRAP · VECTOR
Special production only: a spiral wrap for cut vinyl or fabrication. Never in campaign visuals.

SIRAJ WINDOW · SILK CORNER
An architectural rectangle with one draped corner (top-end), used as the hero image container.

SIRAJ PORTAL
A vertical opening crowned by an asymmetric silk arch, for project reveals and entrances.

ARCHITECTURAL CUT
A plane split by a stencil cut at the Lumen angle, echoing the cuts in SIRAJ.

SILK FOLD
A corner of the page folds along a draped crease, for covers and section dividers.

SILK DRAPE · RASTER
A full-frame silk surface from the SIRAJ Silk engine, for hero backgrounds and end cards.

SILK HORIZON
A silk surface that becomes the ground line, with architecture standing above it.

Real silk only

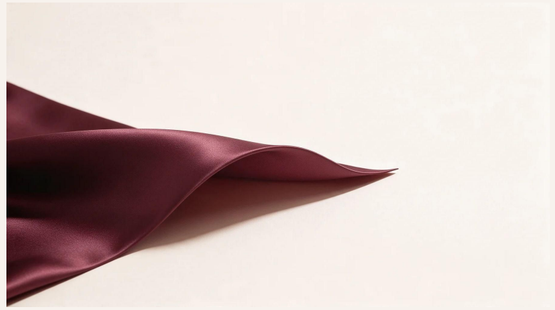

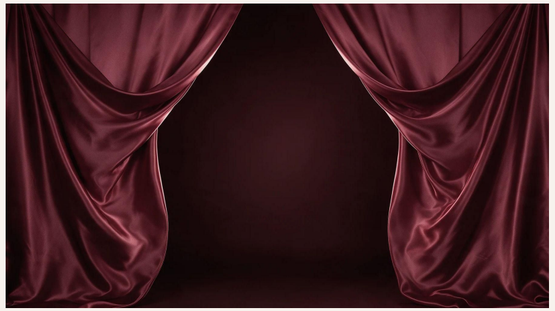

Every silk background is a photograph of real silk fabric. Motion uses real silk footage keyed to alpha. Never a graphic or CG render. 06-SIRAJ-Silk/Stills · Footage

How much, where, how

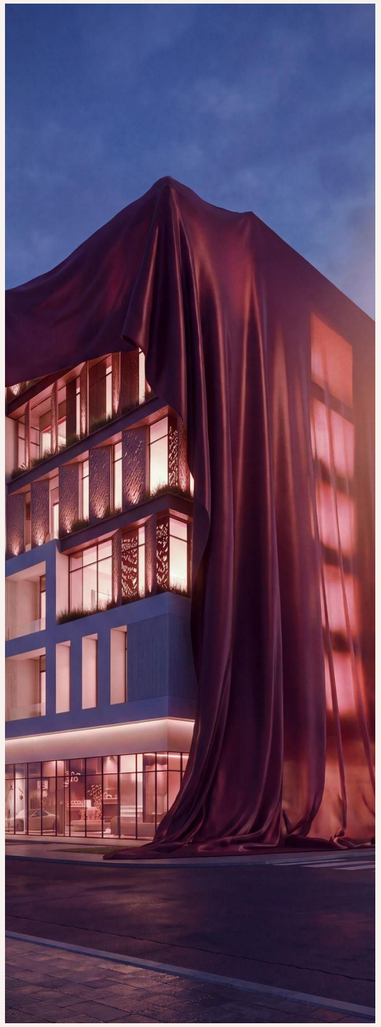

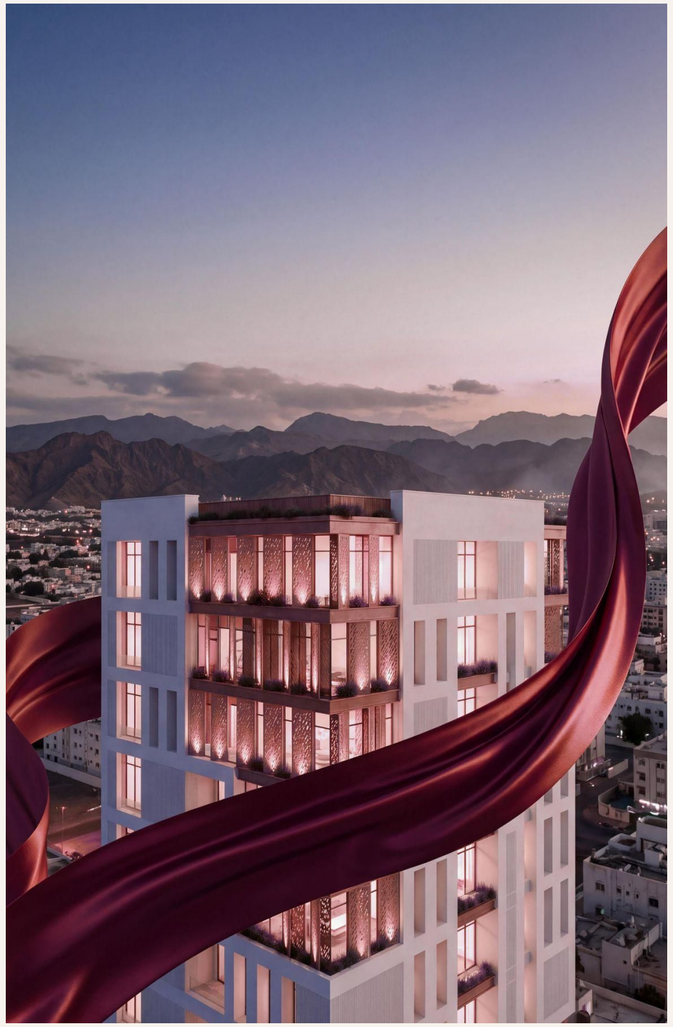

- Use real silk only in visuals: photographed fabric or filmed footage, never a CG render. Vector silk is special production only (vinyl, embroidery, cutting, fabrication).
- Use one silk gesture per layout.
- Keep silk to 35% of any layout that shows architecture or information.
- Enter from the lower start and leave toward the upper end.
- Light comes from a single warm source at the upper end.
- Keep it satin and maroon, either architectural or precious in scale.
- Show no more than three dominant folds.

- ✕ Never hide the property.
- ✕ Never let silk touch, cross or frame the logo.
- ✕ Never use silk as a fashion or garment reference, with bodies or mannequins.
- ✕ Never use glossy plastic, metallic, iridescent or non-maroon silk.
- ✕ Never crumple silk into chaotic flutter.
- ✕ Never cover every layout with silk: restraint is the luxury.

Veil · Ribbon · Reveal · Detail

Real silk interacts with the real building: it veils, wraps, reveals, frames or passes. It never replaces the architecture, and the building is never made of fabric. Silk is always pressed: liquid folds and one sheen, never wrinkled or creased.

The lamp: silk and light carry every hero post

The idea. The building glows from within like a lamp. Real maroon silk **veils** it before launch, **reveals** it at launch, and flies around it as a **ribbon** afterwards. A warm shaft or column of light gives the drama. One silk gesture, real fabric only, no people.

The camera. Cinematic angles: a low angle from the pavement, a drone at dusk over Muscat and the Hajar mountains, a telephoto across a wet street at night, and close details of the terracotta screens. Every scene is built from the approved project renders, so the architecture stays the project's own.

28

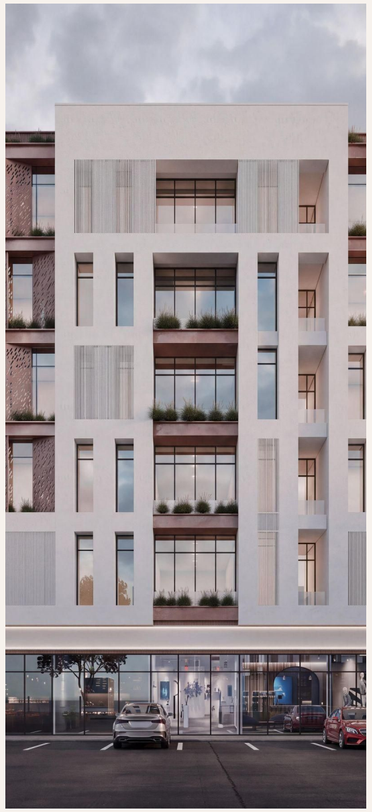

Photography

التصوير

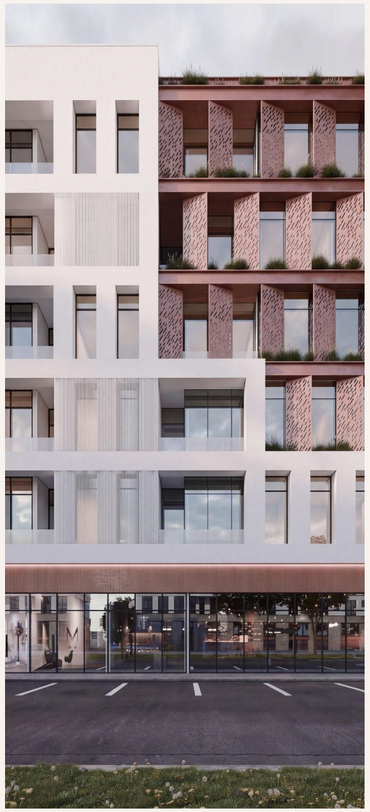

Architecture first, ivory-rose light

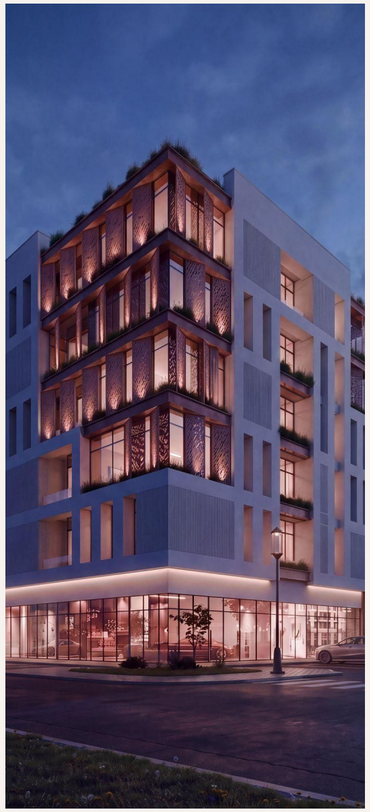

CORNER · CLOUDY DAY

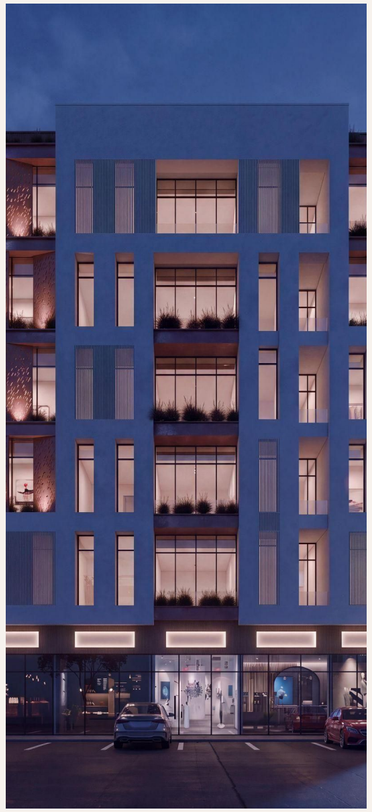

FRONT · CLOUDY DAY

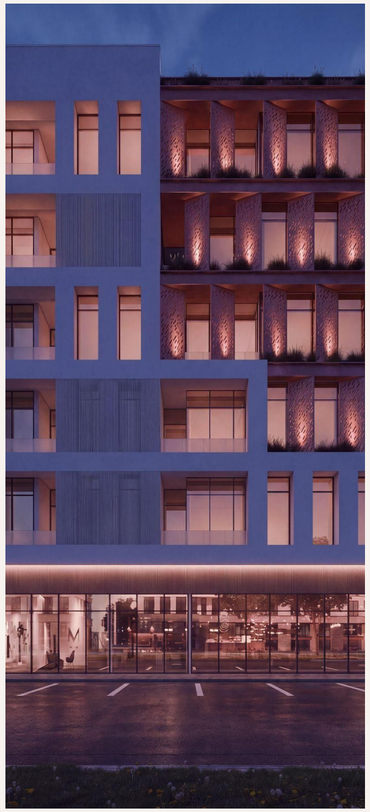

SIDE · CLOUDY DAY

CORNER · BLUE HOUR

FRONT · BLUE HOUR

SIDE · BLUE HOUR

Only the real project and its approved renders. Prefer no people; when people appear, women wear hijab and modest dress and Omani men wear dishdasha and massar. Light is soft and cinematic: cloudy day or blue hour, warm ivory-rose, never yellow or gold.

Direction by subject

SUBJECT	COMPOSITION	CAMERA	LIGHT	PEOPLE
Exteriors	Corrected verticals; sky as negative space	24–35 mm, eye level or slightly low	Golden or blue hour	None, or tiny for scale
Interiors	One- or two-point perspective; view through glazing	24 mm tilt-shift	Raking daylight	None, or a hand
Drone	Masterplan legible, context of sea and mountains	Oblique 45–60°	Low sun, soft haze	None
Construction	Precision and progress	Wide, tripod	Dawn	Workers in PPE, distant
Lifestyle	Candid, architecture dominant	35–50 mm	Evening warmth	A mix of Omani and international; Omani men in dishdasha and massar; all women in hijab
Investment	Details: models, materials, plans	50–90 mm	Soft window light	Hands only

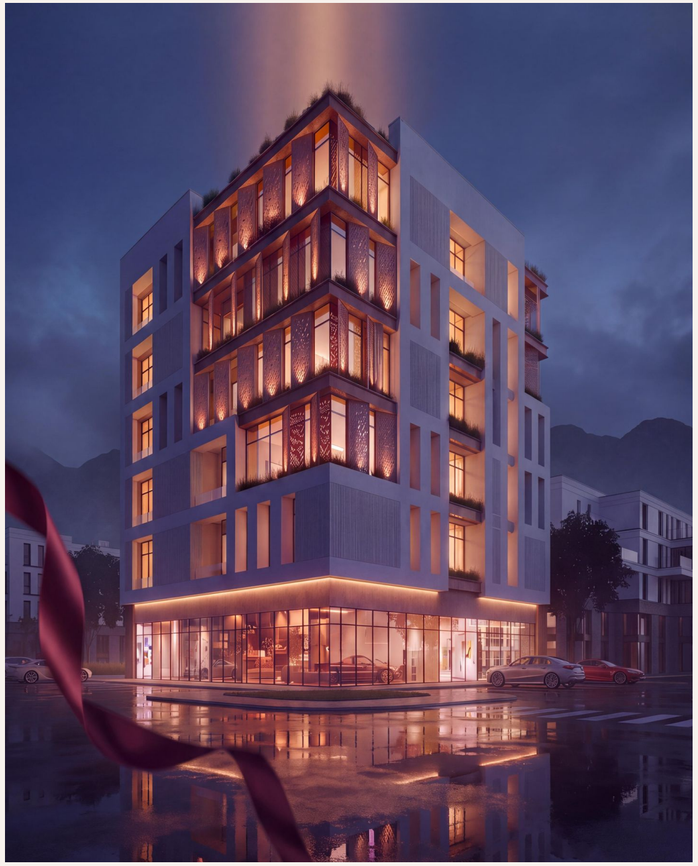

- Strong architecture and premium materials.
- Warm, controlled contrast with cinematic depth.
- Authentic Omani context.

- × No over-saturated HDR, fake smiles, obvious stock or lens flares.
- × No unrealistic skies, hyper-glossy renders, gold or chandeliers.

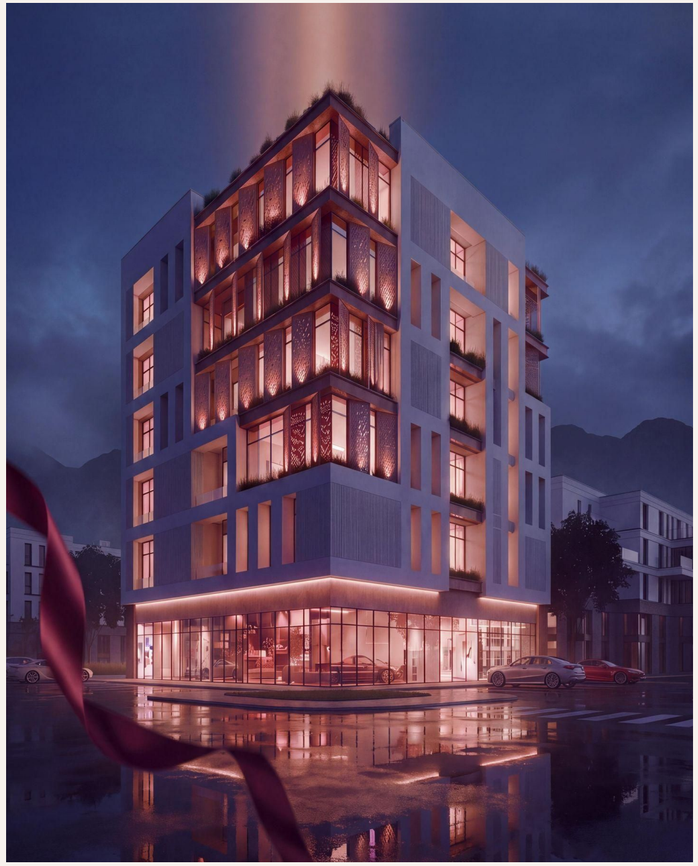

- **People: mandatory rule.** Women appear only in a hijab that fully covers hair and neck, with loose, modest clothing. لا تُستخدم إلا صور نساء محجبات دون إظهار الشعر أو أي عورة.
- Casting is a natural mix of Omani and international residents, investors and professionals. Omani men wear the dishdasha with the Omani massar (المصر).

- × No uncovered hair, tight or revealing clothing, or intimate poses.
- × Omani men are never shown in the kumma or a Gulf ghutra. The rule covers all imagery: CGI scale figures, stock, AI, video and events.

The SIRAJ Luxe Grade · less yellow, more depth

BEFORE

AFTER: SIRAJ LUXE GRADE V1.0

tools/siraj-luxe-grade.py works in CIE Lab: it pulls amber and yellow out of lamps, windows, haze and sun so warm light reads ivory-rose; it deepens and cleans the blacks, rolls off the highlights softly and quiets the chroma at the very top. The SIRAJ maroon band is protected. Every render, key visual and silk still is finished with it.

30

Round caps · round joins. One continuous S- or C-curve per icon — the expressive gesture.

LUMEN ◆ 3
Filled 45° diamond, 2.5–3.5 across. The light point: pin head, key bow, beacon, growth tip.

FILLED KNOCK-OUTS
Same silhouette, evenodd holes. Negative lines run 1.5 so they read as 1.25.

2 px padding · Keylines: circle Ø20 · square 18 · portrait 16×20 · landscape 20×16 · Stroke centre-line

STROKE
1.25 on the 24 grid (compact 1.5 at 16–20 px). Keylines and live area describe the centre-line; the half stroke may sit in the padding. Coordinates on the .25 grid.

CAPS & JOINS
Architecture: square caps, mitred joins, square corners. Silk: round caps and joins, used on the one flowing curve of an icon.

LUMEN
A filled 45° diamond, 2.5–3.5 across (3 by default). The light source of the icon: pin head, key bow, beacon, growth tip. Never more than one accent role per icon.

OPTICAL
Circles run −0.5 larger than squares (r 9.5 vs 18 square); acute mitres pulled inside the live area; filled holes enlarged to compensate the body stroke.

SIRAJ ICON SYSTEM · SIZE TEST

16 · 20 · 24 · 32 · 48 px

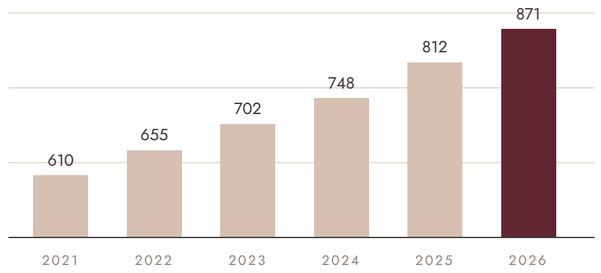

Outline at the master 1.25 stroke, then the compact 1.5 stroke recommended at 20 px and below, then the filled style (20 px minimum for knocked-out detail).

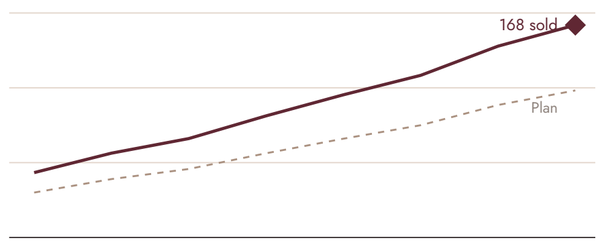

Calm, precise, honest charts

Bar: average price per m², OMR. Highlight one bar in Maroon and keep the rest in Sand.

Line: sales against plan. Maroon for actuals, Stone dashes for plan, a Lumen marker on the key point, direct labels.

Stacked bar instead of a pie: the unit mix, with values set in light numerals.

Palette, in order: Maroon, Stone, Graphite, Silk Highlight, Warm Grey, Deep.

Form: hairline gridlines, no 3D, no shadows. Prefer direct labels over legends and a stacked bar over a pie.

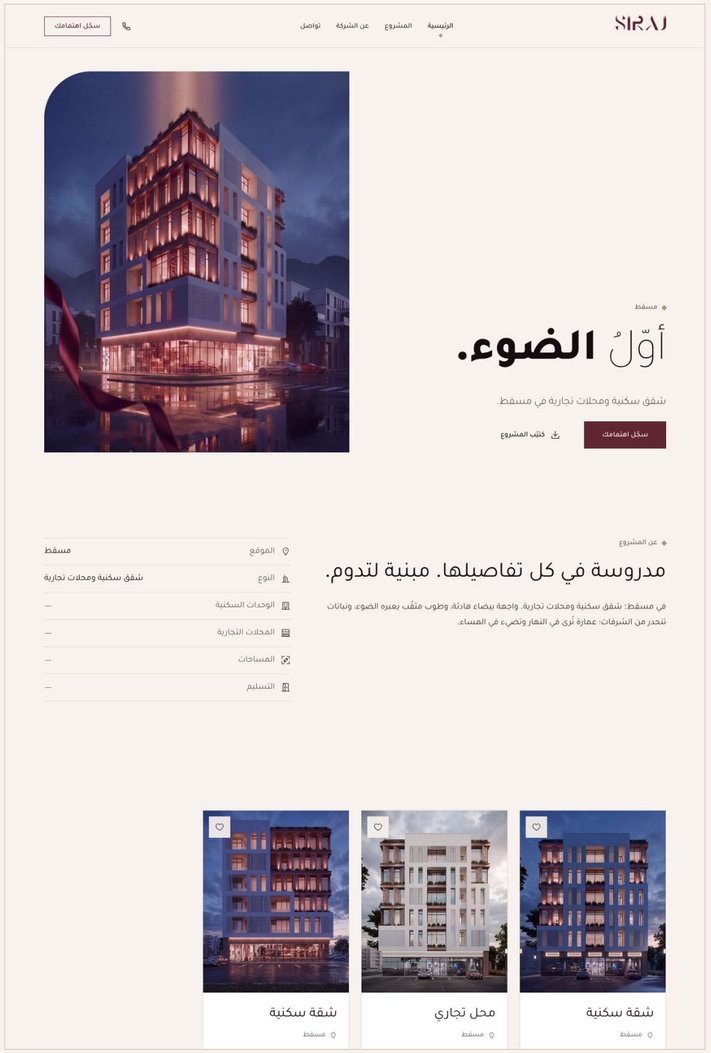

Honesty: bars start at zero unless the axis break is stated. Label illustrative data.

◆ PROFILE · AVATAR

One mark, every platform.

01-Logos/Dark/SIRAJ_Social-Avatar_Circle_v1.0.png · 1080 × 1080 master
Copy: 11-Social/Profile/SIRAJ_Social_Avatar_Circle_1080_v1.0.png

DISPLAY SIZES

Profile	Story ring	Feed	Comment
UPLOAD 1080 PX	110 PX	64 PX	40 PX

RULES

- **Same avatar everywhere** — Instagram, LinkedIn, X, TikTok, YouTube, WhatsApp Business. Upload the 1080 px master; never a screenshot.
- **Sand wordmark on the G1 gradient**, centred inside the circular crop with ½ H clear space. The platform applies the circle; never add a ring.
- **Handle** SIRAJPROPERTIES on every platform, so search and tagging stay consistent.
- **Don't** swap in project logos, add text or campaign art, recolour the gradient, or use photography as the avatar.
- **Don't** redraw, stretch, outline or re-letter the wordmark — export from the supplied master only.

Contact line and clean artwork

On every post

- Contact line = **phone number · Instagram icon + SIRAJPROPERTIES**, at the bottom-end, opposite the logo
- The Instagram icon always replaces «@»; the handle is always written in capitals
- The artwork carries only the message, the logo and the contact line
- Render and investment disclaimers go in the **caption**, under the post

Never on a post

- × The «@» sign (use the Instagram icon)
- × The website address (it belongs on stationery, presentations and documents, written WWW.SIRAJPROPERTIES.NET)
- × Side notes, footnotes, source lines or fine print on the artwork
- × A second logo or a boxed CTA button

Token **{contact.post_line}** is the default footer in the social engine and in make-post.

Motion

الحركة

The controlled movement of silk

FLOW

Movement enters with continuous momentum.

DRAPE

Elements settle like falling fabric.

REVEAL

Content is uncovered as silk reveals architecture.

WRAP

A ribbon travels around an object or title.

FOLD

Transitions behave like controlled folds.

GLIDE

Camera and UI moves are smooth and confident.

SETTLE

Every animation ends calmly and precisely.

Elegant, cinematic, architectural and controlled. No bounce, no elastic movement, no flashy transitions.

Six levels, one source

FLOW
(0.45, 0.05, 0.15, 1)

DRAPE
(0.16, 1, 0.3, 1)

GLIDE
(0.65, 0, 0.35, 1)

FOLD
(0.7, 0, 0.2, 1)

REVEAL
(0.77, 0, 0.18, 1)

RELEASE
(0.5, 0, 0.75, 0.25)

MICRO
(0.2, 0, 0, 1)

LEVEL	DURATION	EASE	STAGGER	SCALE	USE
micro	120ms	drape	0ms	1 → 1	hover, press, focus
fast	200ms	drape	30ms	1 → 1	toggles, tooltips, small state changes
standard	360ms	flow	60ms	1 → 1	panels, cards, menus, drawers
emphasis	640ms	flow	90ms	1.02 → 1	titles, image reveals, page sections
hero	1200ms	reveal	120ms	1.04 → 1	hero reveals, silk sweeps, project reveals
cinematic	2400ms	glide	200ms	1.06 → 1	intro, outro, logo reveal, full-screen transitions

Source: **motion-system/tokens/siraj-motion-levels.json**, built to CSS, JS and TypeScript (**siraj-motion.css**: .m-micro … .m-cinematic). Reduced motion: opacity only, 120 ms.

No bounce, elastic, glitch, flashy zoom, random 3D or gold clichés.

Air moves the silk, the trees and the plants

Air moves the silk, the trees and the plants. Nothing soft moves on its own; it moves because a breeze passed through it.

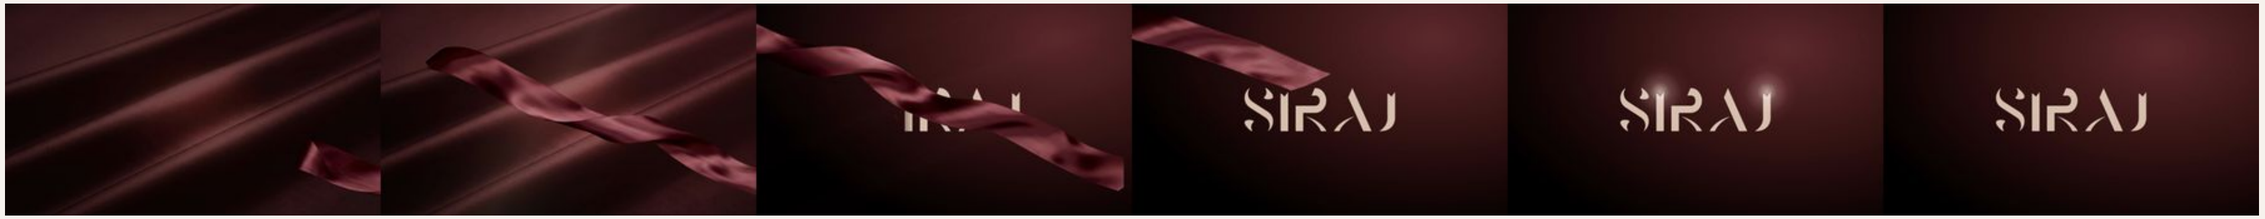

الهواء هو ما يحرّك الحرير والأشجار والنباتات. لا شيء ليّن يتحرك وحده؛ يتحرك لأن نسمةً مرّت به.

LEVEL	AIR	SILK WAVE	FOLIAGE	USE
still	0–0.5 m/s	0–1% of cloth width	0–0.5°	logo holds, end cards, reading time
whisper	0.5–2 m/s	1–3% of cloth width	0.5–1.5°	default ambience: intro opening, backgrounds, loops
breeze	2–4 m/s	3–6% of cloth width	1.5–3°	silk sweeps, ribbon pass, reveals
gust	4–6 m/s (peak, ≤ 1.2 s)	6–10% of cloth width	3–5°	one accent per film at most: the moment the veil lifts

- One prevailing direction per scene: right → left
- A wave travels across the cloth; the far edge lags 120–300 ms
- At most one gentle gust per film, then SETTLE
- Palms and trees sway from the trunk with the same air
- Pressed silk only: liquid folds and one sheen
- Close-ups use high-resolution footage (4K)
- Light is ivory-rose, never yellow or gold

- × Storm, flapping, jitter or a looping wobble
- × Wrinkled, crinkled or creased silk
- × Wind that moves the architecture

Official brand intro · 6 s · 16:9 and 9:16

TIME	ACTION
0.0	Near darkness; a warm lamp light breathes in at the upper end.
0.3	A maroon silk ribbon enters along the Silk Axis, with light travelling across it.
1.5–3.2	The ribbon sweeps across; behind it, the official wordmark is revealed.
3.6–5.2	The ribbon exits; the two Lumens ignite and settle.
4.6–6.0	Final frame: logo, negative space, stillness.

Formats: 16:9, 9:16 and 1:1; ProRes 4444 and WebM with alpha; a bilingual lockup version; optional sound. Source: 16-Intro/source/siraj-intro.html.

Optional sound and 3D language

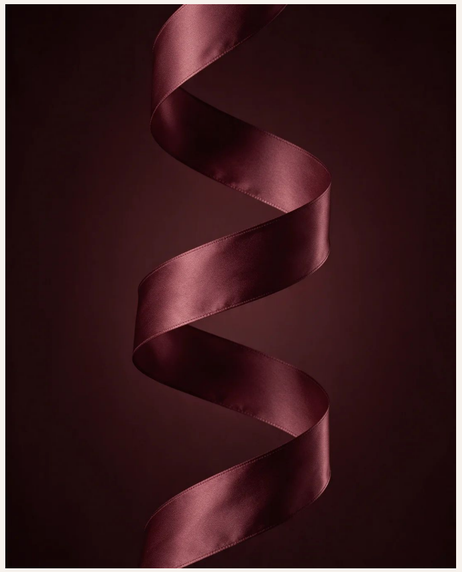

SOUND (OPTIONAL, NEVER PART OF THE IDENTITY)

CUE	CHARACTER
Silk Glide	Refined fabric glide as the ribbon enters
Stone Resonance	Soft felt-mallet resonance in a stone space as the logo settles
Lumen Shimmer	Two delicate glints at the Lumen ignition

Intro and outro beds sit at –23 / –24 LUFS with a true peak of –3 dB. No whooshes, trailer hits or bass drops. Every visual works muted.

3D / CGI

The objects are the silk ribbon, silk plane, silk wrap, architectural monolith, Portal, and the Lumen as a light source. The hero material is SIRAJ Silk: base #602733, sheen tinted #C79A9C, anisotropy 0.6. Use matte stone and bronze glass. Never chrome or gold.

Fixed, flexible, prohibited

Fixed

- Official logo and its geometry
- Core colours: Maroon, Deep, Sand, Stone
- Typography: Jost, Tajawal, Western digits
- Proportions, clear space, minimum sizes
- Icon style
- Key motion behaviour: intro, outro, easings

Flexible

- Campaign compositions
- Silk formations, within the silk rules
- Photography and project imagery
- Project naming and endorsement
- Controlled secondary graphics

Prohibited

- Altering, redrawing or recolouring the logo
- Gold, metallic or rainbow effects
- Silk over the logo or the property
- Arabic-Indic digits
- Bounce or elastic motion
- Stock clichés and HDR imagery
- Third-party fonts in brand communication

Approval. New templates, campaigns and project sub-brands are reviewed by SIRAJ Marketing. Exceptions are logged in CHANGELOG.md. Brand files change only through versioned releases (v1.x for additions, v2.0 for any change to fixed elements).

Before anything leaves the building

- [ ] The official logo is unaltered, with ½ H clear space and above the minimum size
- [ ] Correct logo variant for the background, with enough contrast
- [ ] Colours come from the palette and proportions feel right
- [ ] Jost and Tajawal only; Western digits; Arabic never tracked
- [ ] Text meets 4.5 : 1 contrast; Stone is never used for text on light
- [ ] Layout sits on the grid; one silk gesture at most; silk is under 35%
- [ ] Silk is real fabric (photo or footage), never a graphic
- [ ] Silk never touches the logo or hides the property
- [ ] Imagery is architecture-first, warm and graded with the SIRAJ Silk Grade
- [ ] RTL is mirrored correctly; bidi runs (phones, URLs) are isolated
- [ ] Motion uses token easings with no bounce; reduced motion is respected
- [ ] Posts and outros: phone number and Instagram icon + SIRAJPROPERTIES only; never «@», never the website
- [ ] Website, where allowed, written in full and in capitals: WWW.SIRAJPROPERTIES.NET
- [ ] Silk, trees and plants move with one consistent breeze; the architecture never moves
- [ ] No side notes, footnotes or disclaimers on the artwork; disclaimers go in the caption
- [ ] Recognisable as SIRAJ before seeing the logo
